Retention time

Raw RT

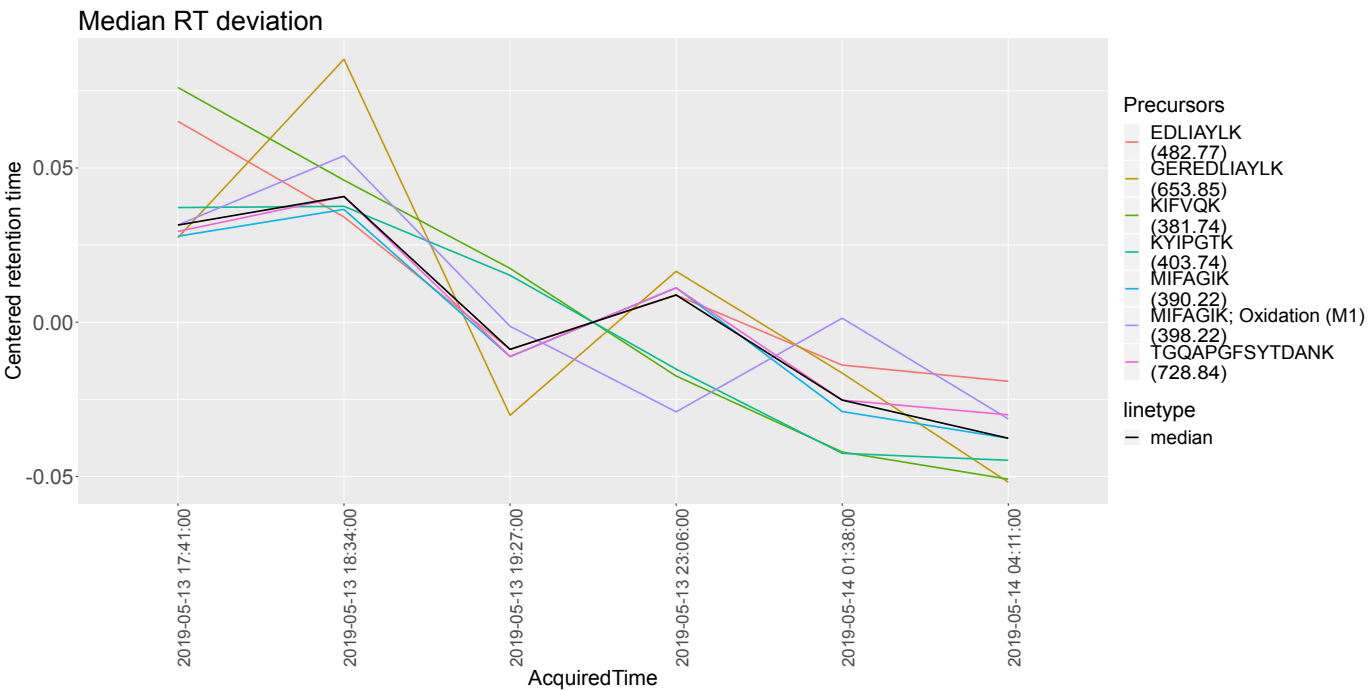

Save figure

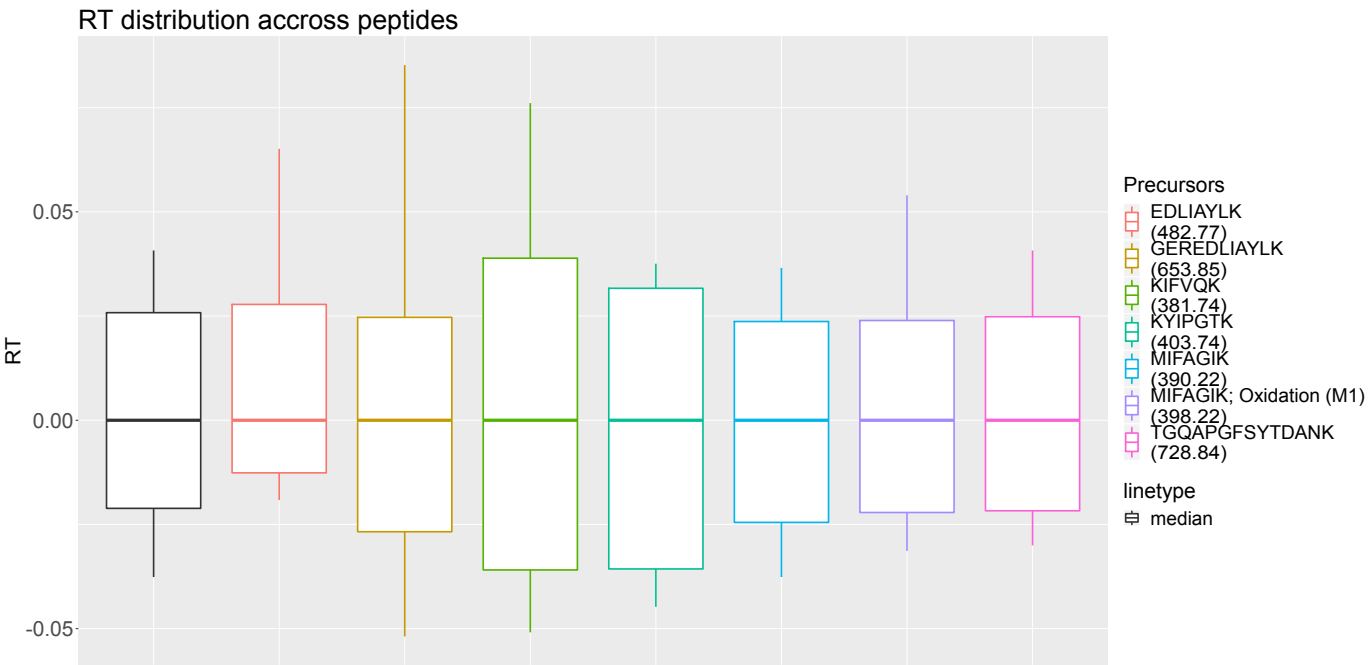

Save figure

Median relative RT

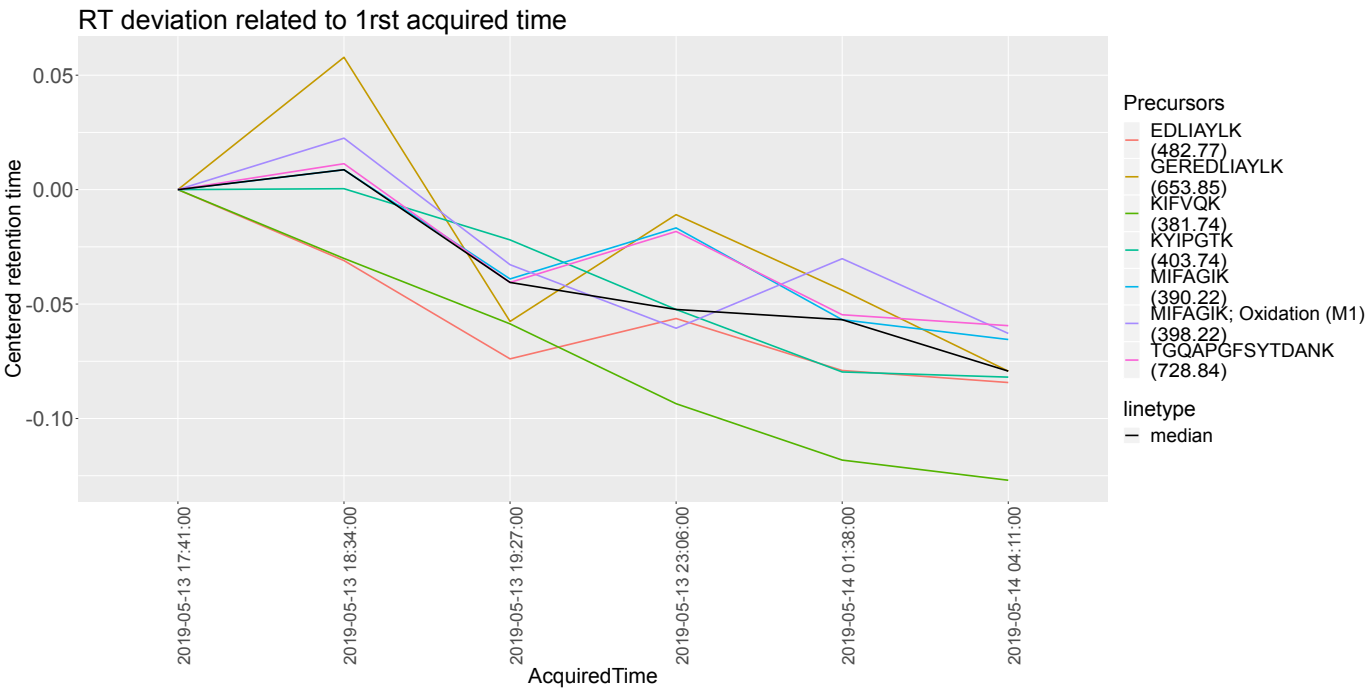

Save figure

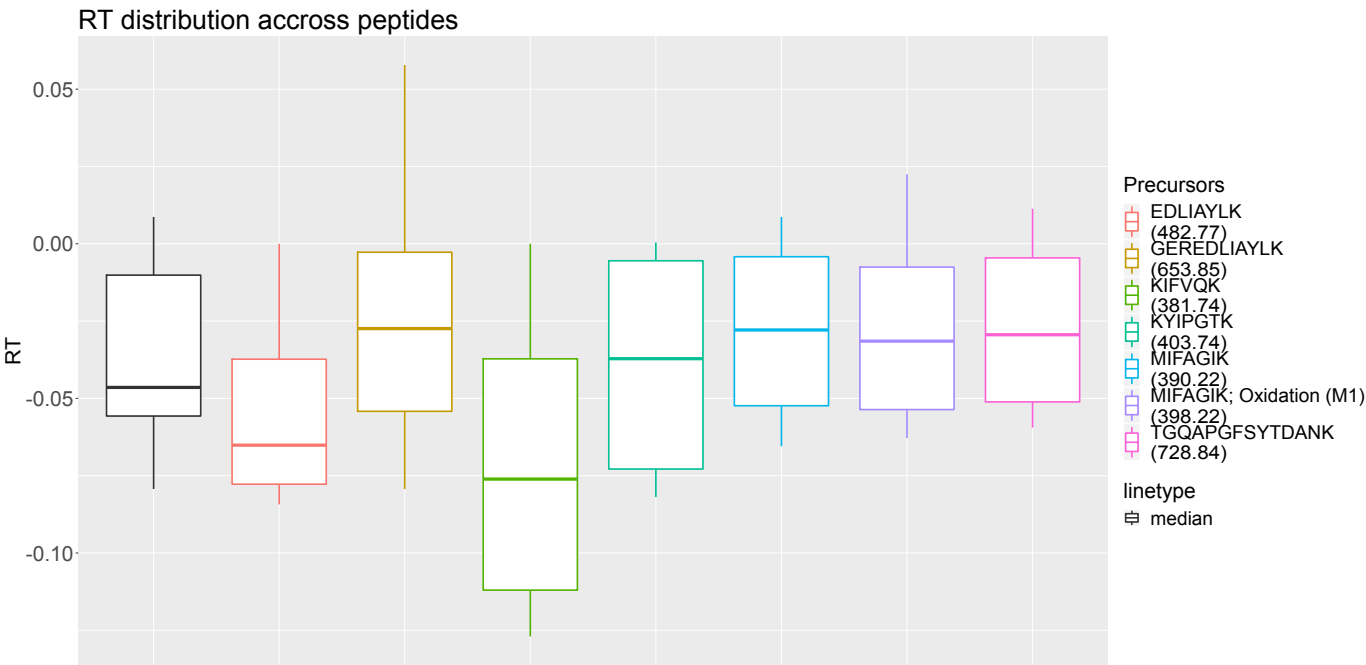

Save figure

RT were normalized by computing the difference between each acquired RT and the median of all for each precursor.

First time relative RT

Save figure

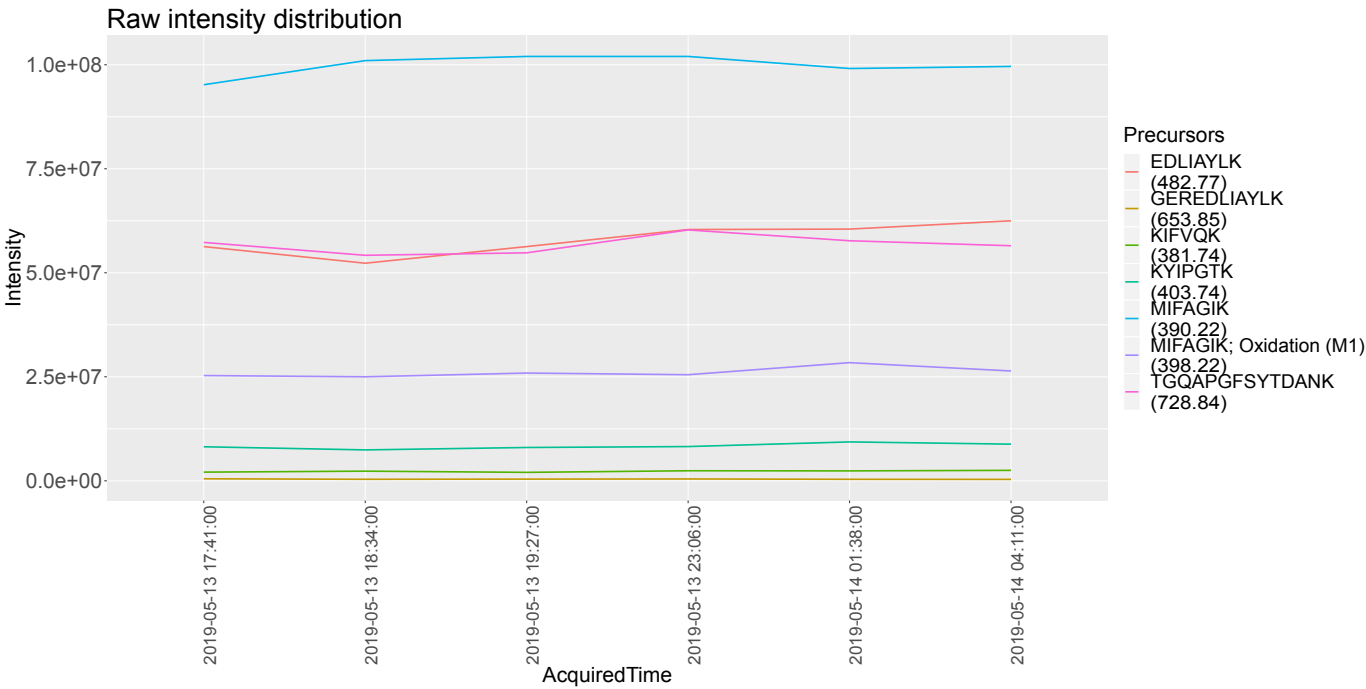

Save figure

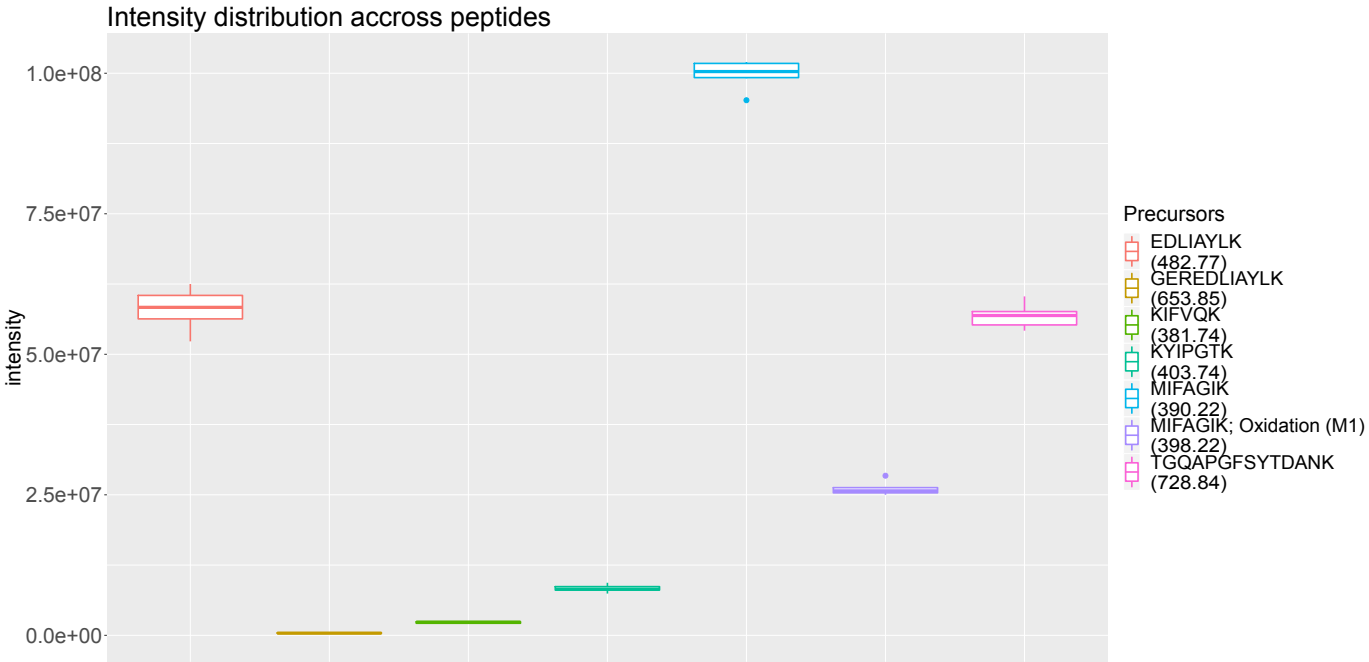

RT were normalized by computing the difference between each acquired RT and the first acquired time where all precursors were observed (2019-05-13 17:41:00)

Intensity

Raw intensities

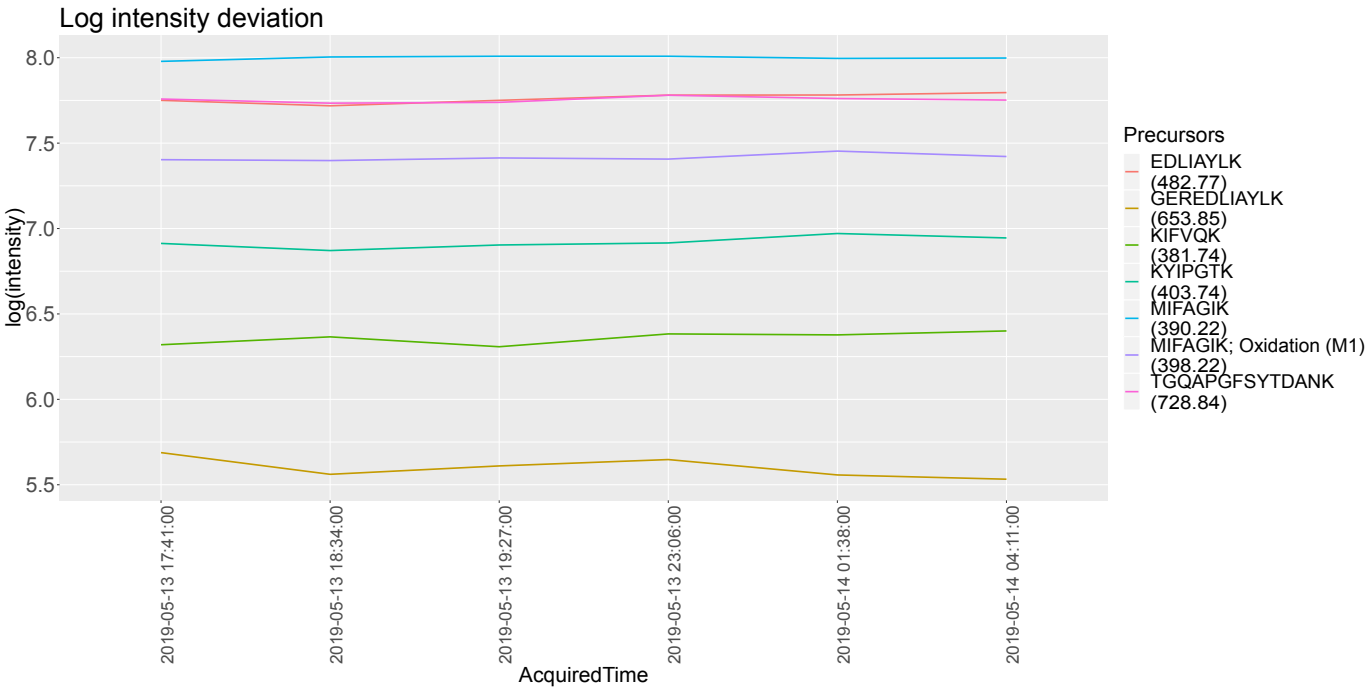

Save figure

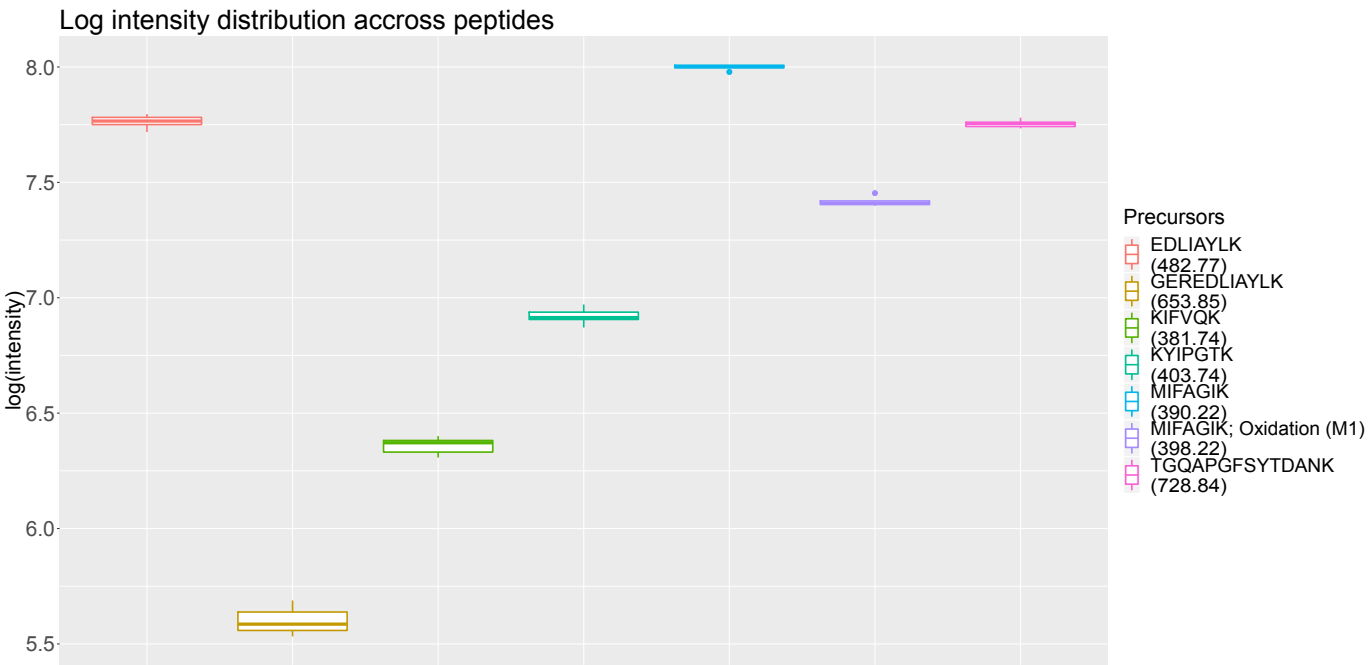

Save figure

Log intensities

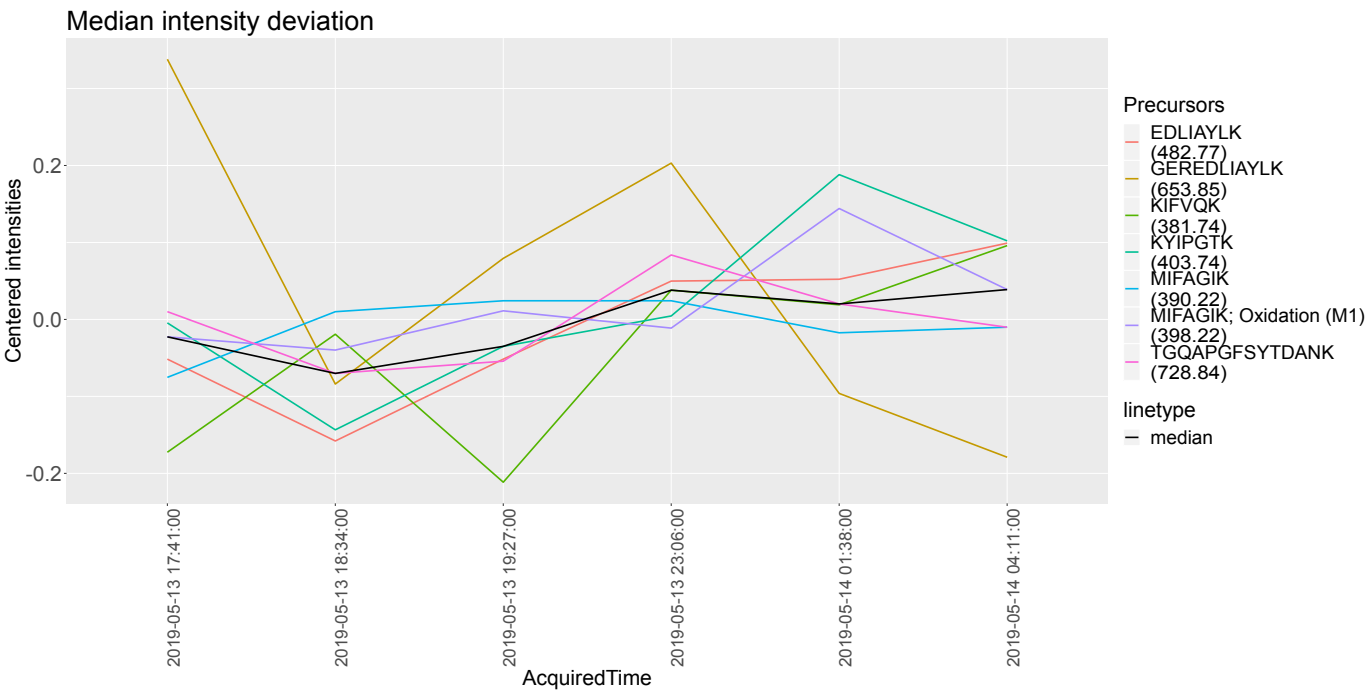

Save figure

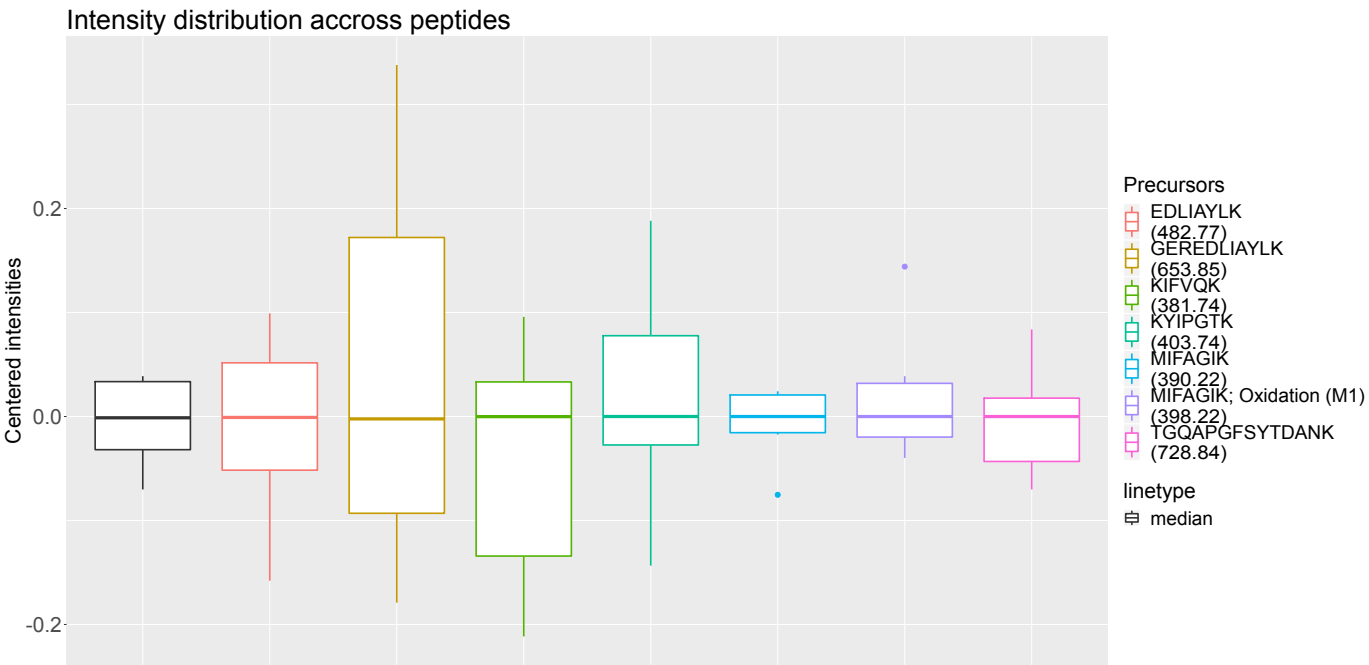

Save figure

Median relative intensities

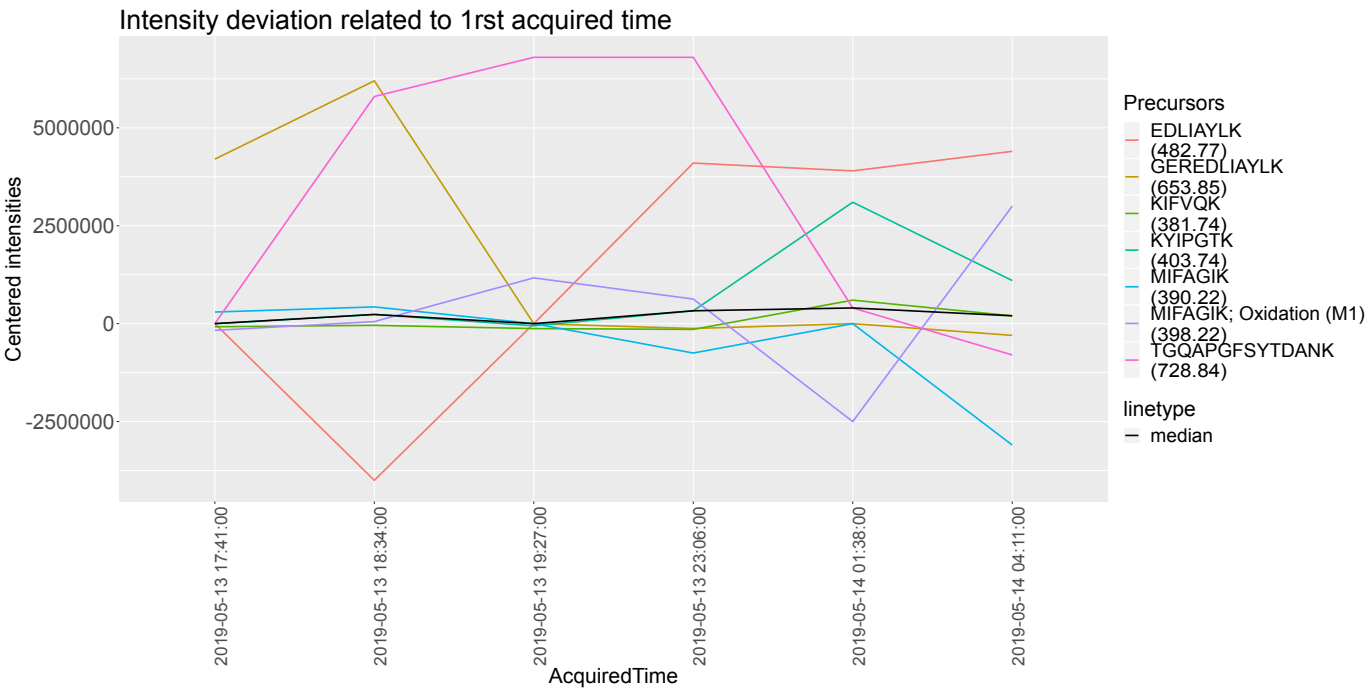

Save figure

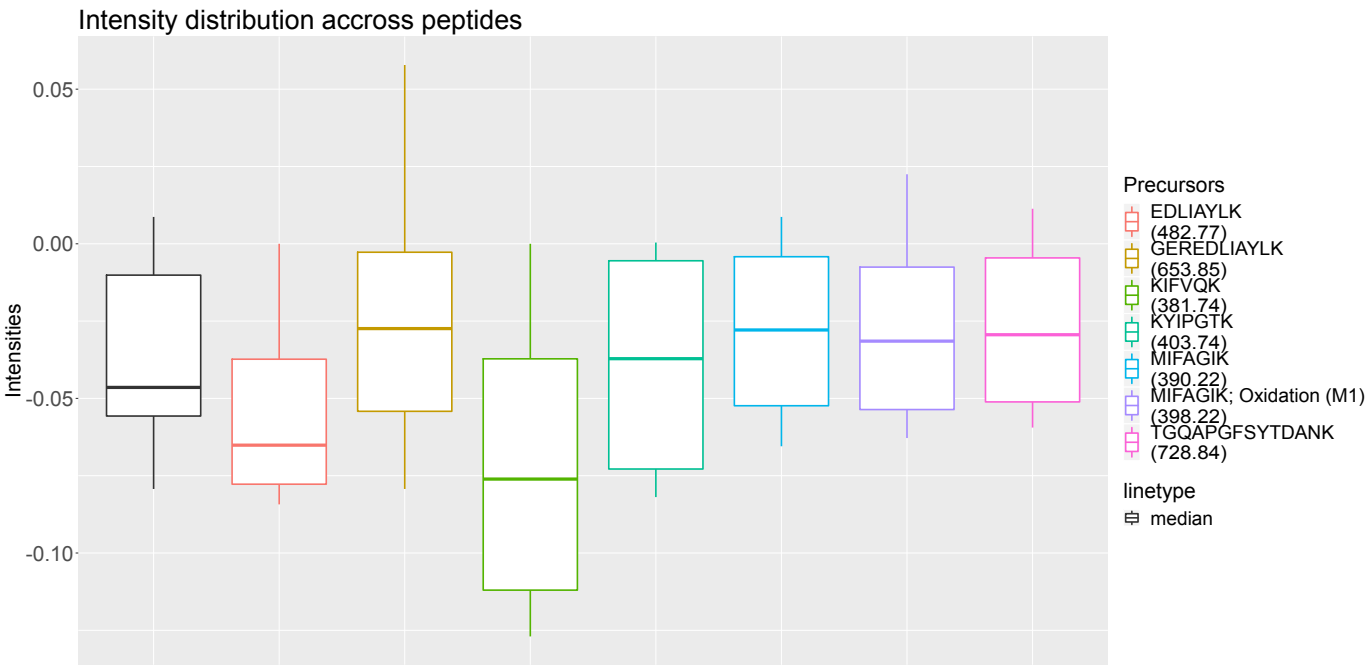

Save figure

Intensities were normalized by dividing each acquired intensity by the median of all for each precursor, and transforming the ratios by log2.

First time relative intensities

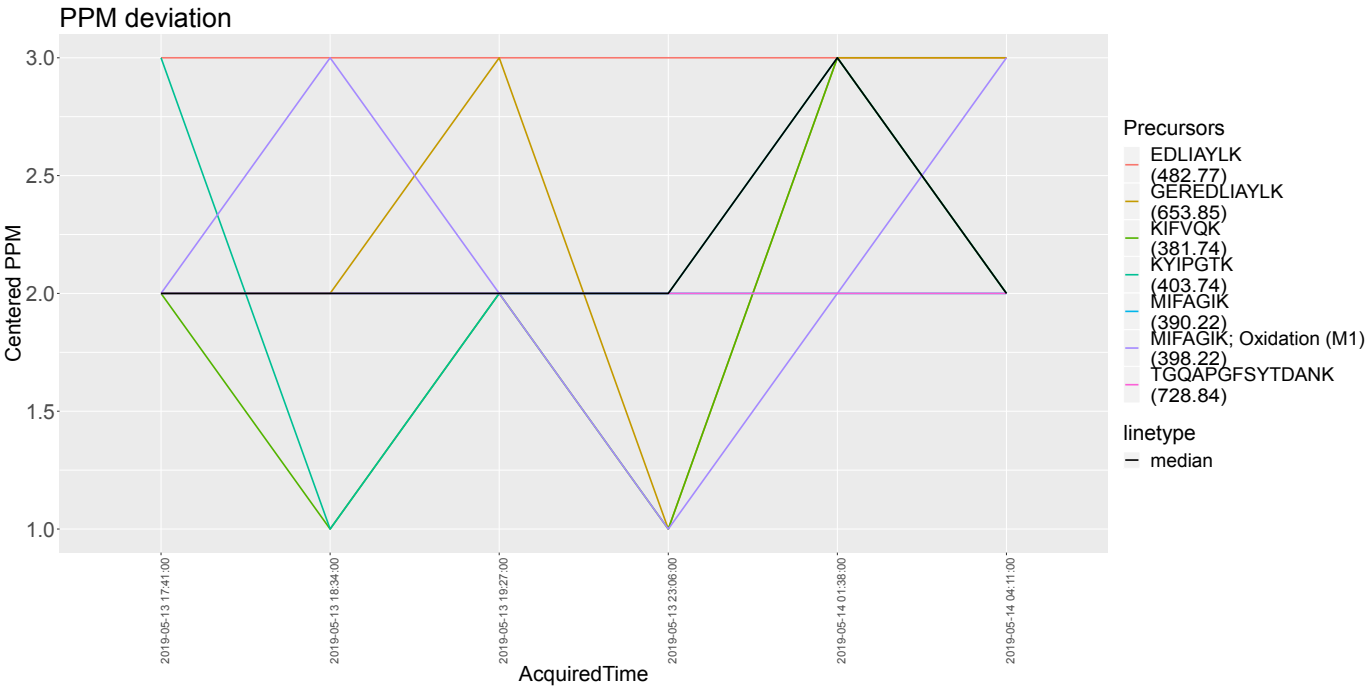

Save figure

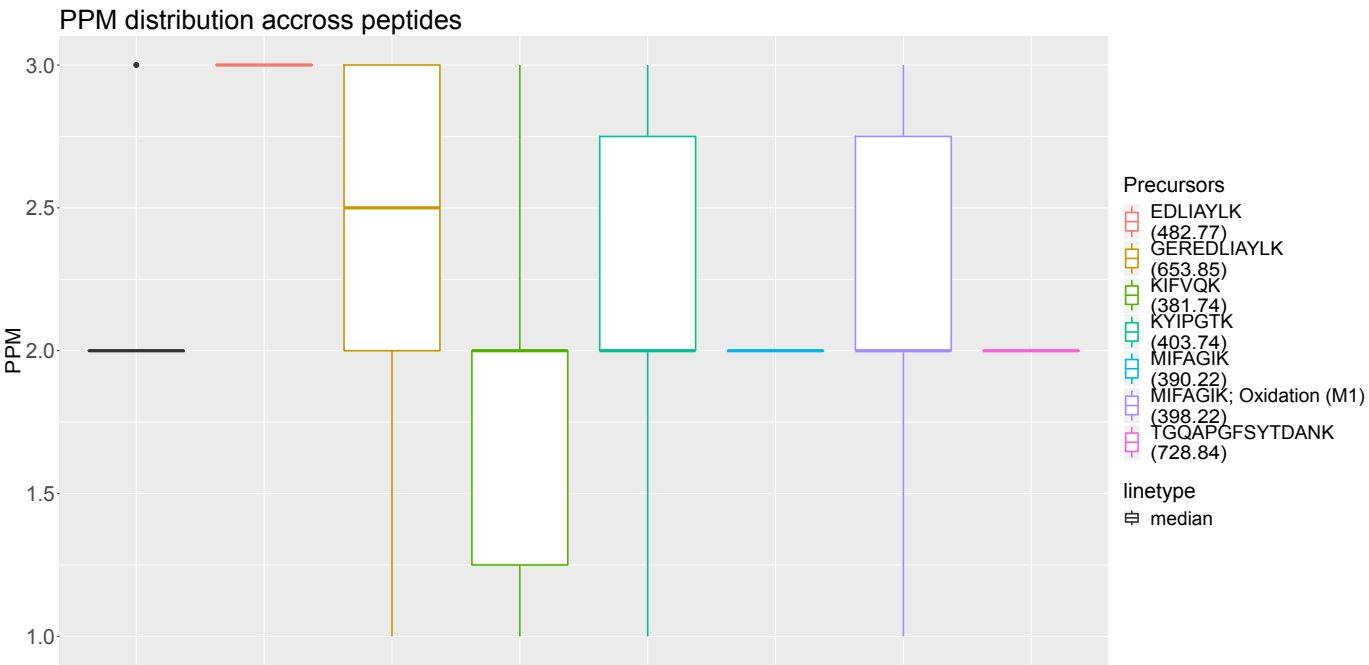

Save figure

Intensities were normalized by computing the ratio between each acquired intensity and the intensity of the first acquired time where all precursors were observed (2019-05-13 17:41:00)
